

VISHAL TAYADE

Full Stack Developer (Java / Spring Boot) | Frontend Engineer

+91-8007725758 | vishal.tayade12@gmail.com | linkedin.com/in/vishal-tayade | github.com/VishalTayade | Pune, India

PROFESSIONAL SUMMARY

Full Stack Developer with **3.5 years** of experience building backend and frontend systems, including hands-on delivery of **Java and Spring Boot REST APIs** within a **microservices architecture** for an insurance-domain platform (policy, claims, premium, quote, and onboarding services) at Hover Technologies. Experienced designing and building new microservices, maintaining and extending existing services, and handling service-to-service communication using **Docker, Kubernetes, and RESTful APIs**. Hands-on with **PostgreSQL**, including schema design, queries, aggregation pipelines, and data migration, with working exposure to **AWS (EC2, S3, RDS)** for basic cloud deployment. Complements backend work with strong frontend expertise in React.js and Angular, giving full end-to-end ownership of features. Comfortable using AI-assisted development tools (Claude Code, GitHub Copilot, Cursor) with practical prompt-engineering experience to speed up delivery. Works independently in Agile/Scrum teams, collaborating across frontend, backend, QA, and product.

TECHNICAL SKILLS

Languages: Java / Java 8, JavaScript (ES6+), TypeScript, HTML5, CSS3

Backend: Spring Boot, Hibernate / JPA, RESTful APIs, Microservices Architecture, RESTful API's, Node.js (basics), GraphQL (basics)

Databases: MySQL, PostgreSQL, MongoDB (NoSQL)

DevOps & Tools: Docker, Kubernetes, AWS (EC2, S3, RDS - basics), Git / GitHub / GitLab, Jenkins, CI/CD, Postman (API contract testing), Linux/Ubuntu

Frontend: React.js, Angular, Redux, React Hooks, React Router, Next.js (basics), Tailwind CSS, Bootstrap, Material UI

Testing: JUnit (basics), React Testing Library, Jest, Unit & Integration Testing

UI/UX Design: Figma, Adobe XD, Design Systems, Wireframing, Prototyping, Storybook

Methodologies: Agile / Scrum, Code Reviews, Responsive Design, Performance Optimization, Cross-browser Compatibility

AI-Assisted Development: Claude Code, GitHub Copilot, Cursor, ChatGPT, Prompt Engineering (used for unit test generation and rapid prototyping)

PROFESSIONAL EXPERIENCE

Software Developer (Full Stack) - Hover Technologies Pvt. Ltd.

Mar 2025 – Aug 2026

Insurance-domain platform - policy management, claims processing, premium calculation, quote generation, and customer onboarding

- Designed and developed **RESTful APIs in Java and Spring Boot** for policy lookup, claims processing, premium calculation, quote generation, and customer onboarding modules.
- Built new microservices and maintained/extended existing services within a **Docker- and Kubernetes-based microservices architecture**, handling service-to-service communication through a **RESTful APIs**.
- Used **PostgreSQL** for policy and claims document storage - designed schemas, wrote queries and aggregation pipelines, and supported data migration efforts.
- Defined and validated API contracts using **Postman**, collaborating closely with backend and QA teams to reduce integration defects by 30%.
- Supported deployment testing on **AWS EC2** staging environments and **S3**-based asset hosting as part of the team's basic cloud infrastructure workflow.
- Architected React.js and Angular frontend modules consuming these APIs, with reusable component libraries and state management - reducing UI development time by 20% per sprint, with unit/integration test coverage via JUnit, React Testing Library, and Jest.

Frontend Developer - Smartatech India Pvt. Ltd.

Mar 2023 – Dec 2024

- Designed and developed reusable React.js components with React Router - scalable architecture adopted as team standard across 3 product modules.
- Reduced initial page load time by 30% through code splitting, lazy loading, and Webpack optimizations, measured via Lighthouse audits.

- Integrated RESTful APIs with robust error handling and structured logging; introduced practices that cut average bug resolution time by 25%.
- Strengthened test coverage using React Testing Library and Jest; maintained code quality through peer reviews and GitLab merge-request workflows.
- Led design reviews and stakeholder feedback sessions during prototyping - reducing post-development design revisions by 40% and accelerating sprint delivery.
- Ensured cross-browser compatibility and responsive layouts using mobile-first CSS with Bootstrap and Tailwind CSS.

Web Developer - Hirect India	Apr 2022 – Nov 2022
• Built responsive React.js web experiences with clean component architecture, increasing user engagement by 45% (session duration analytics). • Implemented a real-time chat UI module (typing indicators, unread states, instant rendering) that improved user retention by 50%. • Introduced React Testing Library and structured logging workflows, reducing bug resolution time by 30% and improving code reliability. • Delivered pixel-perfect UI implementations aligned to Figma design specifications. • Ensured cross-browser compatibility and accessibility compliance across all feature surfaces. • Collaborated with product and design teams in Agile sprints to deliver features on schedule with consistent UI quality.	

KEY PROJECTS

Insurance Policy & Claims Platform - Hover Technologies	Mar 2025 – Aug 2026
Role: Full Stack Developer (Backend & Frontend)	
Technologies: Java, Spring Boot, Microservices, Docker, Kubernetes, RESTful API’s, PostgreSQL, Postman, React.js, Angular, AWS (EC2, S3)	
Designed and built RESTful APIs and microservices for an insurance platform covering policy lookup, claims processing, premium calculation, quote generation, and customer onboarding. Used PostgreSQL for policy/claims document storage (schema design, aggregation pipelines, data migration), containerized services with Docker and ran them on Kubernetes behind a RESTful APIs, and built the React.js frontend that consumed these services. Supported basic deployment testing on AWS EC2/S3 .	

Advanced Data Dashboard - Smartatech India	Mar 2023 – Dec 2024
Role: Frontend Developer	
Technologies: React.js, Redux, RESTful APIs, Webpack, React Testing Library, Jest	
Built analytics dashboards with reusable React.js components, Redux state management, and RESTful API integration for real-time data visualization, including interactive drill-down filtering widgets for exploring business metrics. Optimized load time by 30% via lazy loading, code splitting, and Webpack tuning, and reduced dashboard bugs by 25% through React Testing Library and Jest coverage.	

Recruitment Platform - Real-Time Messaging Module - Hirect India	Apr 2022 – Nov 2022
Role: Web Developer	
Technologies: React.js, Figma, Responsive/Mobile-first CSS	
Built a mobile-first, responsive React.js web platform connecting job seekers and recruiters, with a clean, reusable component architecture that increased user engagement by 45%. Developed a real-time chat module (typing indicators, unread-notification states, instant message rendering) that improved user retention by 50%, delivering pixel-perfect UI from Figma designs with cross-browser compatibility.
